INVESTMENT PHILOSOPHY

We use in-depth proprietary research to uncover investments that have the potential to offer consistent returns over the long term and downside protection through market cycles. We believe combining a focus on high or improving return on invested capital (ROIC) with niche market companies that have defensible competitive advantages and target smaller overall markets allows companies to compound value over time by generating strong free cash flow, reinvesting that cash at high rates of return, which results in compounding free cash flow and can ultimately lead to an increase in equity value.

KEY FEATURES

- Utilizes a core investment approach consisting of companies with a market capitalization that does not typically exceed those in the Russell 2500™ Index.
- Employs proprietary screens to limit the universe to companies with low embedded expectations.
- Leverages our investment process with the goal of identifying catalysts of change for improved returns while guarding for risk.
